QA Devops Assessment

Test case 1 - Play and win/lose games of Duel Duo

Test will make sure you can play and win a game and the win/loss counter will accurately reflect a win or loss.

1. Open game in the browser.
2. Draw and select bots.
3. Duel and check for a win or loss statement.
4. Check to see if the wins counter increases on a win, or if the losses counter increases on a loss.

Bug - Win counter does not increase on a win, instead adds a loss to the record.

Reproduce bug by:
1. Open browser
2. Draw and select bots
3. Click duel, 'repeat until you get a win'
4. Check the counter for results

Expectation: A win will add a number to the "Wins" counter.
Actual Result: A win will not increase the "Wins" counter but will increase "Losses".

Test case 2 - Use the "See All Bots" button to view all of the different "bot" cards.

Test will make sure you have a visual representation of all the possible "bot" cards upon pressing the button.

1. Open game in browser
2. Click on "See All Bots" button
3. List all of the bots available

Bug - No "bots" appear after button is clicked.

Reproduce bug by:
1. Open browser
2. Click on "See All Bots" button

Expectation: All available "bot" cards will appear.
Actual Result: Nothing happens.
